Summary

Full-Stack Developer with experience in building scalable applications, automating processes, and managing databases. Proven track record in transforming complex business requirements into technical solutions using Python, JavaScript, and C#. Experienced in AWS, Linux server administration, and Agile methodologies.

Experience

Full-Stack Developer, Ria Ventures – Remote / Latin America Feb 2023 – Dec 2024

- Led the backend team on "Soy Yo Digital", a flagship project for the company.
- Implemented a payment gateway and integrated accounting systems, automating transaction calculations and financial reporting.
- Transformed complex business requirements into scalable technical solutions, including database modeling and system architecture.
- Developed RESTful APIs for seamless data exchange between front-end and back-end components.
- Engineered responsive front-end interfaces using JavaScript and React.js, and mobile applications using React Native.
- Automated recurring tasks such as report generation and data manipulation using Python scripts and Pandas.
- Configured and managed Linux servers, implementing monitoring and security solutions.
- Maintained and administered AWS services (EC2, S3) ensuring optimal server performance and reliability.

Full Stack Developer (Freelance), CIAT (Tropical Agricultural Research Center) – Bolivia May 2020 – Dec 2022

- Developed a full-stack web application for livestock data management with role-based access control.
- Designed and developed a native Windows application for agricultural data management using C# and a lightweight SQL database.
- Built back-end architecture using Python Flask, ensuring scalability and performance.
- Designed and managed relational databases (SQLite and MariaDB), optimizing queries for data integrity.
- Deployed and maintained services on Ubuntu servers, ensuring security and uptime.
- Conducted data transformation and analysis using Pandas to improve data processing workflows.

Education

University of Bucharest, Bachelor's Degree in Cybernetics, Statistics and Economic Informatics – Bucuresti, Romania Jan 2023 – Jan 2027

- Studying through a scholarship.

University of Innovation, Bachelor (120 credits completed) in Systems Engineering – Bolivia Jan 2020 – Jan 2022

Certificates

Certificate in IoT Fundamentals - Big Data & Analytics with Python Jan 2022

Certificate in Data Analytics with Python (Cisco) Jan 2021

CCNAv7 Certificate (Cisco) Jan 2021

Skills

Languages: Python, JavaScript, C#, Java, SQL.

Frameworks & Libs: React.js, React Native, Node.js, Django, Flask, Pandas, ASP.NET MVC.

Databases: PostgreSQL, SQL Server, MongoDB, SQLite, MariaDB.

Infrastructure: AWS (EC2, S3), Linux Terminal, Server Administration, Github.
