Location: Bucuresti, Romania. **Linkedin:** [nicolas-romano-sanchez](#)

KEY COMPETENCIES

Automate processes
Creativity and Innovation
Strategic planning
Problem Solving
Data Processing

Manage databases
Continuous Learning
Adaptability and Flexibility
Teamwork
server administration

Communication
Time and Priority Management
leadership abilities
Attention to Detail

LANGUAGES

JavaScript
Python
C#
Java

Tools/Utilities

Django
Node Js
Flask
React Js
React Native
Asp .Net MVC
Pandas
Github
Linux Terminal
Api Rest
AWS
SCRUM Agile Methodology

DATABASES

SQL
PostgreSQL
SQL Server
MongoDB

PROFESSIONAL EXPERIENCE

Employer: Ria Ventures as a Full-Stack Developer - Feb 2023 - Dec 2024

Description: Ria Ventures. develops applications for institutions and small business, leveraging over 5 years of experience leading Projects in Latin America. I led the backend team on one of the most important projects of the company „Soy Yo Digital”.

- Transform complex business requirements into highly scalable technical solutions. This includes modeling databases tables, programs workflow and system architecture.
- Implemented a payment gateway and integrated its accounting system, automating transaction calculations, reconciliations, and financial reporting.
- Engineered front-end interfaces with responsive design, leveraging JavaScript for dynamic content and user interaction.
- Developed responsive mobile applications using React Native and web applications with React.js.
- Implemented user-centric solutions to address various project challenges, enhancing overall user experience and functionality.
- Built and integrated RESTful APIs for seamless data exchange between front-end and back-end components.
- Automation and process optimization through Python scripting to design effective solutions for complex challenges.
- Developed stored procedures to retrieve and update data in the database according to business requirements.
- Model objects and abstract complex problems into simpler solutions for implementation.
- Configured and managed Linux servers, implementing monitoring and security solutions.
- Maintain and administer AWS services, including EC2 instances and S3 storage, ensuring optimal server performance and reliability.
- Collaborate with the Design team, Business Analysts, and end users to align technical solutions with business needs.
- Subject Matter Expert (SME) and key specialist in a flagship project of the company.
- Automated recurring tasks such as report generation and data manipulation tasks using Python and Pandas.
- Developed data pipelines for cleaning, transforming, and analyzing large datasets.
- Coordinate with commercial and technical team to deliver the most appropriate solution to the development team.

Client: CIAT (Freelance) - May 2020 - Dec 2022

Description: CIAT is a tropical agricultural research center located in Bolivia. I worked as a Full stack developer, created applications according to business requirements

- Implemented secure and efficient data handling in a full-stack web application for livestock data management, including role-based access control and multiple custom forms for dynamic data entry.
- Designed and developed a native Windows application for agricultural data management, enabling local calculations and efficient data storage using a lightweight SQL database.
- Developed and maintained the back-end architecture using Python Flask, ensuring scalability and performance.
- Engineered front-end interfaces with responsive design, leveraging JavaScript for dynamic content and user interaction.
- Designed and managed relational databases (SQLite and MariaDB), optimizing queries and ensuring data integrity across systems.
- Built and integrated RESTful APIs for seamless data exchange between front-end and back-end components.
- Conducted data transformation and analysis using Pandas, improving the efficiency of data processing workflows.
- Deployed and maintained services on Ubuntu servers, ensuring uptime, security, and performance.

- Created and tested application logic to validate API functionality and ensure reliability.

EDUCATION

- Bachelor's Degree in Cybernetics, Statistics and Economic Informatics, University of Bucharest, Romania, through a scholarship. 2027.
- Completed 120 credits towards Bachelor of Systems engineering from University of Innovation, Bolivia. 2022.
- Certificate in Data analytic with Python from Cisco Networking Academy, Bolivia. 2021
- Certificate in IoT Fundamentals: Big Data & Analytics with Python from TecNet Technology, Bolivia. 2022
- Certificate in CCNAv7 Cisco Networking Academy, Bolivia. 2021
