Summary

Motivated Full-Stack Developer and Cybernetics undergraduate dedicated to bridging theoretical academic knowledge with practical, high-impact technical applications. Solid hands-on experience in designing backend architectures, normalizing databases, and automating workflows. Highly collaborative team player, skilled in partnering with frontend developers to deliver scalable, efficient solutions using Python, JavaScript, and C#. Eager to contribute technical adaptability and problem-solving skills to innovative, efficiency-driven projects.

Experience

Full-Stack Developer, Ria Ventures – Remote / Latin America Feb 2023 – Dec 2024

- Acted as the sole backend developer for the flagship "Soy Yo Digital" project, collaborating closely with a frontend developer to define system architecture, establish data flows, and normalize databases.
- Assisted in implementing a payment gateway and integrating accounting systems, which streamlined transaction calculations and automated financial reporting.
- Developed RESTful APIs to ensure seamless and secure data exchange between front-end interfaces and back-end servers.
- Engineered responsive user interfaces using JavaScript and React.js, alongside mobile applications utilizing React Native.
- Automated recurring operational tasks, including data manipulation and report generation, by writing efficient Python scripts utilizing Pandas.
- Configured and monitored Linux servers, supporting base security protocols and system health.
- Maintained AWS cloud infrastructure (EC2, S3) to support application uptime and reliable server performance.

Full-Stack Developer (Freelance), CIAT (Tropical Agricultural Research Center) – Bolivia May 2020 – Dec 2022

- Developed a full-stack web application tailored for livestock data management, incorporating role-based access control functionalities.
- Designed and built a native Windows application for agricultural data tracking using C# and a lightweight SQL database.
- Established back-end architectures using Python Flask to support application performance and fundamental scalability.
- Structured and managed relational databases (SQLite and MariaDB), optimizing standard queries to maintain data integrity.
- Deployed services on Ubuntu servers, conducting routine maintenance to ensure uptime and basic security.
- Executed data transformation and analysis using Pandas, improving the efficiency of data processing workflows.

Education

University of Bucharest, Bachelor's Degree in Cybernetics, Statistics and Economic Informatics – Bucuresti, Romania Jan 2023 – Jan 2027

- Currently studying under a full academic scholarship.

University of Innovation, Bachelor's Degree (120 credits completed) in Systems Engineering – Bolivia Jan 2020 – Jan 2022

Certificates

Certificate in IoT Fundamentals - Big Data & Analytics with Python	Jan 2022
Certificate in Data Analytics with Python (Cisco)	Jan 2021
CCNAv7 Certificate (Cisco)	Jan 2021

Skills

Languages: Python, JavaScript, C#, Java, SQL.

Frameworks & Libraries: React.js, React Native, Node.js, Django, Flask, Pandas, ASP.NET MVC.

Databases: PostgreSQL, SQL Server, MongoDB, SQLite, MariaDB.

Infrastructure & Tools: AWS (EC2, S3), Linux Terminal, Server Administration, GitHub.
